Subject: Proposed Microsoft Antitrust Settlement

I doubt there are any additional points I could hope to make or add to the list of reasons why this settlement should not be accepted... I only wish to ensure that my extreme opposition to acceptance of this agreement is noted somewhere because I feel I must do something instead of doing nothing to try to stop it...

Our government and the judicial branch should look beyond the quick solutions proposed in this settlement to the Microsoft anti-trust problems and should continue to work further to seek out resolutions which will ensure the protection of fair market competition for all now and in the future...

It is my opinion that an acceptance of this proposed settlement with Microsoft only postpones an inevitable reoccurrence of the problem and does not appropriately address nor resolve the issues on which this lawsuit was originally initiated...

Respectfully,
Debi J. Bullock
